

Now, 4-6 week lead time on all replacement Slant-Flow® Screen Grates!

Ask your TerraSource Global representative for more info!

TERRASOURCE
GLOBAL
HANDLING A WORLD OF MATERIALS

PRECISION OEM SLANT-FLOW® SCREEN GRATES

The top choice for productivity, durability and value.

As you know, nothing beats TerraSource Global's Jeffrey Rader brand of EZ-Access™ Hogs for chip processing power, reliability, performance and ease of maintenance. The precision engineering of these machines, supported by our rugged and durable OEM parts, means you're getting the most scalable, long-lasting and cost-effective solutions for your specific chip processing applications.

Using original OEM replacement parts such as hammers, liners and screen grates maximizes the long-term value of your machine and ensures ongoing access to TerraSource Global's extensive technical and application expertise that third-party vendors can't match.

Why Slant-Flow® Screen Grates are the best choice for your business

4-6 week lead time!

Not only does our improved 4-6 week lead time help keep your operation running with minimal down time, you get piece of mind knowing that you're using the most productive and cost-effective screen grate on the market. TerraSource Global's Slant-Flow® screen grates beat third-party offerings by giving you...

More shredding action; faster material evacuation –

Our Slant-Flow® Screen Grates are angled into the flow of material being shredded, meaning higher performance, less wear on the grates and hammers and more uniform product size.

Less clogging and diminished fines and pins –

Third-party vendors cannot fully and consistently match our unique slant flow screen design that is built specifically for the highest capacity processing.

Minimized chances of operational failure –

All our parts are built to original OEM specs, with verified highest quality materials, for better performance and less chance of failures that can cause widespread damage to other parts such as hammers, rotors, and so on.

Warranty on workmanship –

All of our parts are fabricated by AWS certified welders, which is why we are confident to offer warranties on workmanship. Most third party vendors can't offer such assurances.
