

HANDLING A WORLD OF MATERIALS

INTRODUCING TERRASOURCE GLOBAL'S NEW PREMIUM LINE OF ROLL CRUSHER CHISEL TEETH

THE DURALIFE® ADVANTAGE

TerraSource's new Duralife premium hammers and replacement tips are engineered with special advanced alloys that optimize wear resistance and toughness. Not only does our Duralife line provide customers with all the advantages of TerraSource's standard, high-performance OEM offerings, our new premium line also ensures better wear, longer life and higher shock resistance, which minimizes the potential for cracking in particularly challenging applications.

NEW DURALIFE® AP PREMIUM REPLACEMENT TEETH

Now, TerraSource is providing our Gundlach Roll Crusher customers even more choices to meet the growing competitive demands of their operations. Our new Duralife AP premium chisel teeth integrate innovative material technology into the tips to increase performance, safety and wear-life of your roll crusher equipment.

THE DURALIFE® AP ("ADVANCED PERFORMANCE")

Simply put, the most advanced material composition available for replacement teeth...for the most challenging applications

Our premier Duralife AP brand of precision, high-performance chisel teeth utilize a propriety braising process to uniformly integrate an advanced tungsten carbide insert into a heavy-duty base. This enhancement makes these teeth the preferred solution for industrial operations requiring the ultimate mix of superior impact-zone performance and up to 4x longer wear than typical chisel tooth offerings available by third-party vendors.

TERRASOURCE'S STANDARD OEM REPLACEMENT PARTS

TerraSource OEM parts are always a better choice than third-party offerings: better value, better performance, better safety and better service and engineering support with every purchase.

TerraSource understands the way your entire application solution works – we are there every step of the way, from initial design all the way through installation and post-purchase service. All the OEM parts in your TerraSource solution are engineered exactly to the equipment in your specific operation to work at the optimal level you expect and to ensure the best ROI for the life of your equipment.

Third-party parts cannot offer this level of design precision, material integrity, safety and operational performance. And nobody else can offer our customers the added value of

- Application expertise and technical support
- Free material testing and solution recommendations
- Rapid response on all orders and delivery
- Preferred access to new products

Contact your local sales representative to learn more about the benefits of a long-term partnership with TerraSource Global.
