

DURALIFE®: A NEW STANDARD IN PREMIUM HAMMERS FOR MINING & POWER

Now, TerraSource is providing our mining and power customers with even more choices to meet the growing competitive demands of their operations. Our new Duralife premium hammers offer you multiple options and price points to increase performance, safety and wear-life of your crushing equipment.

DURALIFE® PREMIUM HAMMERS

TerraSource’s new Duralife premium hammers are engineered with special advanced alloys that optimize wear resistance and toughness. Not only does our Duralife line provide customers with all the advantages of TerraSource’s standard, high-performance OEM offerings, our new premium line also ensures better wear and higher shock resistance, which minimizes the potential for cracking in particularly challenging applications that may be susceptible to tramp materials.

DURALIFE® XP - “eXtra Performance”

Specialized hard-facing options strengthen high-wear areas and enhance striking surface integrity and hammer mass

For customers wanting the extra striking power and increased wear life offered by hardfacing, our “eXtra Performance” (XP) options add custom-engineered hardfacing to ring and paddle hammers, which can double wear life* compared to chromoly steel.

Duralife® XP ring and paddle hammers with advanced alloys and hardfacing

DURALIFE® AP - “Advanced Performance”

Simply put, the most advanced hammer-material composition on offer, for the most challenging applications

Our premier brand of high-performing precision hammers, the unique Duralife AP line blends patented, metal-matrix materials into specific high-impact areas of the hammer to provide greater resiliency than brittle, bi-metal parts. These enhancements – designed exactly to customer specifications – make these parts the preferred solution for industrial operations requiring the ultimate mix of superior impact-zone performance and up to 4x* longer wear than third-party products or chromoly steel.

Duralife® AP hammers with patented, metal-matrix custom casting in application-specific, high-impact target area.

BUILT ON THE STRONG FOUNDATION OF OUR STANDARD OEM OFFERINGS

TerraSource OEM parts are always a better choice than third-party offerings: better value, better performance, better safety and better service and engineering support with every purchase.

TerraSource understands the way your *entire* application solution works – we are there every step of the way, from initial design all the way through installation and post-purchase service. All the OEM parts in your TerraSource solution are engineered exactly to the equipment in your specific operation to work at the optimal level you expect and to ensure the best ROI for the life of your equipment. Third-party parts cannot offer this level of design precision, material integrity, safety and operational performance. And nobody else can offer our customers the added value of

- Application expertise and technical support
- Free material testing and solution recommendations
- Rapid response on all orders and delivery
- Preferred access to new products
