

Redefining the design standard for wood hogs across the industry

TerraSource's next generation Jeffrey Rader Horizontal Wood Hog is re-engineered for improved maintenance, serviceability, safety, and efficiency.

**Key Advantages**

- **New easy-access upper housing** is a game changer for accessibility and safety: No need for external activators and no major pinch points.
- **Pneumatic** rather than hydraulic cylinders for **reduced maintenance**.
- **Array of high-performance hammers** to meet exact application requirements.
- **Unique slant-flow screen grates** drive long-term performance and optimize accuracy and size control.
- **Optional bottom feed roll** provides additional feed control for tough materials.
- **Pneumatic control** for seamless performance, even with large size variation of intake material.

- **Heavy-duty feed roll** for efficient, accurate metering.
- **Compatible with any type of takeaway equipment** (pneumatic devices, conveyors, etc.)

**Benefits of Long-term Partnership**

Our teams of experts offer you the application expertise and technical support you need throughout the purchasing process and life of your Horizontal Wood Hog. Count on TerraSource Global to:

- Improve your operation's success with our application expertise
- Maintain original OEM performance with precision parts and rebuild programs
- Ensure smooth unit integration with skilled start-up and installation assistance
- Apply our extensive knowledge to train and support operators and maintenance personnel
