

Demonstration & Development Center

HANDLING A WORLD OF MATERIALS

TerraSource Global's Demonstration & Development Center, located in Duncan, South Carolina, is our premier facility for conducting equipment demonstrations, customer trainings, and materials testing.

State of the Art Facility with Production Units

This 9,000 sq. ft. state-of-the-art complex houses representative machinery and related auxiliary equipment from each of TerraSource Global's three market-leading brands: Gundlach Crushers, Jeffrey Rader and Pennsylvania Crusher.

The machines available in our center are actual production units that you can run material through to guarantee that what happens in testing is replicable in the field. By analyzing material in several different pieces of equipment, our team can provide data-driven recommendations regarding which machines will most efficiently get customers to their material handling and processing goals.

Some machines available to do testing on include:

Jeffrey Rader

- Vibratory feeder
- CC4000 Chip Classifier
- Hammermills
- Wood Hog/Bark Hog
- Chip-Sizer™
- Disc Screen

Pennsylvania Crusher

- Reversible impactor
- POSIFLOW™ feeder
- Impact Crusher
- Granulator
- Coalpactor

Gundlach Crushers

- Double-roll crusher
- Cage-Paktor® cage mill

Comprehensive Analysis Conducted by Application Experts

Activities conducted within the center include equipment demonstrations; sales, engineering and product development support; continuing education for maintenance and capabilities trainings with customers; and crushing and feeding testing for existing and prospective TerraSource Global customers. Following each test visit, customers receive a comprehensive report detailing the results of the testing as well as machine recommendations by our engineers and sales teams that best suit your operational requirements.

TerraSource Global's Demonstration & Development Center is just another way we ensure that we provide full-service solutions through our quality equipment, integrated systems and reliable services. Customers leave our test facility confident that our machines will meet and exceed their expectations.

To take advantage of the opportunity to have your company's raw materials evaluated on the Center's fully-operational equipment and visit the facility in person to watch the live testing of same, please contact your TerraSource Global representative.
