### THE BEST TRAINING

A high proportion of our manufacturing specialists are qualified journeymen with a minimum of 8,000 hours of on-the-job training, coupled with four years of formal schooling.

### THE MOST EXPERIENCE

Our professionals ensure that the proper procedures are followed and that the correct parts are on hand when needed. As a result, in most cases we can remanufacture your equipment more cost effectively and in a more timely manner than your in-house team could.

### SPECIALIZED PROCEDURES & KNOWLEDGE

We perform special examination procedures to find concealed damage and unusual wear. We use our proprietary equipment knowledge to incorporate heat-treated parts, special alloys and new part designs where appropriate for improved performance.

### REBUILD PROGRAM BENEFITS:

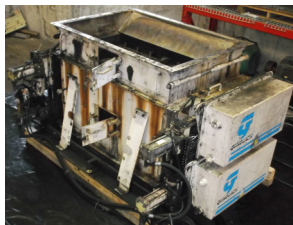

- Equipment updated to fit requirements of new processes/materials
- Upgrades and improvements can be conveniently added after original purchase
- Initiates a full factory warranty covering material defects and workmanship
- Extends the useful life of equipment and boosts return on investment
- Returns equipment to OEM specifications for sustained, superior performance
- Provides exceptional value — rebuild expense is typically a fraction of the cost of purchasing comparable new equipment

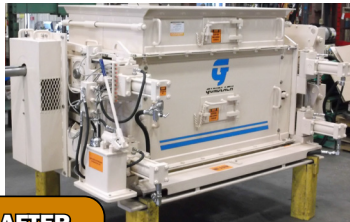

# NOT JUST REPAIRED. REBUILT TO OEM SPECS.
