

Interstate Companies: Putting Customers First Since 1957

Interstate Companies is a dynamic industrial conglomerate dedicated to delivering exceptional value through distribution, industrial product sales, and manufacturing solutions.

Proud Partner with TerraSource Global for OEM Parts

Our expertise spans a diverse range of industries, including sales and support for buses and heavy-duty trucks, final-stage vehicle manufacturing, and diesel engines. We also excel in industrial bearings, power transmission products, industrial transmissions, power generation, transport refrigeration, industrial labor, and contract assembly services.

DuraLife®/UltrAlloy® Premium Hammers

TerraSource's new DuraLife®/UltrAlloy® premium hammers are engineered with special advanced alloys that optimize wear resistance and toughness.

With over 55 business units strategically located across the Midwest, Rocky Mountain, Southwest, and West regions of the United States, Interstate Companies is committed to driving operational excellence and customer satisfaction.

DuraLife®/UltrAlloy® XP - "eXtra Performance"

TerraSource's new DuraLife®/UltrAlloy® premium hammers are engineered with special advanced alloys that optimize wear resistance and toughness.

Why OEM Parts are Better

- Only TSG OEM parts are manufactured using proprietary alloys in castings, hard-facing, and overlays vs third-party parts for performance and dependability.
- TSG OEM hard-facing application is engineered for maximum performance on key sections of the part for cost effectiveness and durability vs aftermarket companies that hard face the entire part which increases cost.
- TSG OEM parts mitigate risk and save money lost during equipment downtime vs aftermarket parts that prematurely fail increasing equipment shutdown.
- Multiple hard-facing options are available including Tungsten Carbide, Chrome Plated, and Vanadium Carbide depending on operational parameters and equipment specifications.
- Aftermarket parts are produced using lower quality ASTM metals that will damage equipment and present operator safety issues when failing during operation.
- TSG OEM parts are field proven and engineered for maximum performance and ease of replacement mitigating equipment downtime.

Trust TerraSource Global OEM Spare Parts when Safety and Performance Matters

Superior Value:

OEM parts offer long-term cost savings through enhanced durability and reliability.

Optimal Performance:

Designed to meet exact specifications, ensuring maximum equipment efficiency.

Enhanced Safety:

Engineered for compatibility, reducing risks associated with improper fit or function.

Comprehensive Support:

Backed by expert service, technical guidance, and engineering assistance for seamless integration.

**Interstate Bearing Systems has the parts you need,
in-stock, ready-to-ship. Call Today!**
